SAP ERP IMPLEMENTATION FOR YOUR BUSINESS?
When you should realize that it is high time!!!

Need to align operation with business growth strategy:
Your organization has a growth strategy that needs the alignment of operational side of the business (HR, Finance, Procurement, project management, sales, scheduling, Asset maintenance, payroll and Bank integration) in order to realize growth strategies.

Desire for more visibility – one version of the truth:
A desire to reduce the way business operates in silos, a need to integrate business processes and provide single source of reporting information where data such as inventory value, purchase cost, project can be accurate with minimal reconcilation effort.

Legacy system outgrow:
Scale of operation has outgrown legacy system which has limited integration capability, less modules built in to support your business operation or less interface capability to other solutions.

Desire for more system based controls:
Organization may desire to have better controls that are system driven, examples of controls that may be desired could be around overhead cost control, project cost control, vendor management control, product control, warehouse and inventory control

Finance operation and reporting challenges:
Difficulty in Financial operations and reporting as at when due. High level of reconciliation required to produce reports on customers receivables, vendor payables, Financial statements, Invoice delay, overpayment ,internal customer complains, account entry issues, real-time reporting almost impossible ,Tax remittance and regulatory compliance issues

KEY BENEFITS OF IMPLEMENTING SAP EPR

SECURITY & Regulatory Compliance
Keep data safe and regulated with built-in protections.

Eliminate redundant processes and tasks through automation.

PRODUCTIVITY

STREAMLINE Processes & Efficiency
Automate all business operations cross-departmentally.

FOSTERS GROWTH

Competition
Stay on top of technology solutions, ahead of your competition.

Mobility and Flexibility
Work from home, your office, or anywhere with a mobile-friendly solution.

SAVE MONEY!

INTEGRATED INFORMATION
All customer and financial data, housed in one location.

Centralized data will bolster interdepartmental collaboration.

Collaboration

CUSTOMER SERVICE
Faster, more accurate access to customers' information and history.

Forecasting & Reporting

5 STEPS TO IMPLEMENTING SAP ERP

At Digital Enterprise Limited we follow SAP project delivery methodology with a twist of Value realization and post implementation value management to ensure customer are able to realise visible positive impact on implementation of SAP ERP

01 UNDERSTAND YOUR BUSINESS

Before implementing SAP ERP for your organisation, we seek to get thorough understanding of your organization, the structure of the company, strategy, processes needed to pursue strategy, the demand from external stakeholders and regulatory requirements .This knowledge provides important basis and business specification for implementation.

02 IDENTIFY KEY PROCESS AND IMPROVEMENT AREAS

Key processes are processes that have maximum impact on the success of an organization. Identifying the key processes during implementation helps us in determining the improvement areas for these processes. In turn, these business processes can be changed or improved for better results. We provide detailed engagement session with process owners and managers to ensure collaboration and change management.

03 DOCUMENT VALUE REALIZATION (FINANCIALS AND EFFICIENCY)

We document expected value to the business, We agree on value the business will realise from the implementation, provide means of measuring value in terms of Financials , efficiency and effectiveness of operations.

04 IMPLEMENT SAP ERP SOLUTION

Our implementation tools and expertise helps clients implement their SAP software faster and at a lower cost than industry average.
We carefully design the implementation and integration of SAP software based on value realisation and business requirement

05 VALUE REALIZATION MANAGEMENT

Once SAP solution is deployed successfully at your organisation , we continue to provide value realisations management service that ensures value is measured ,processes are improved and new innovations for business growth is achieved.
